

PRIMEWARE

Hot Tiles & Electric Hot Tops

Primeware's Hot Tiles are innovative tiled inserts which simply drop in a bain marie well of a servery counter to create a colourful platform for food display.

Hot Tiles are available in GN1/1 and GN4/3 sizes. The Tiles work with the ambient temperature of the servery be it ambient, heated or chilled.

The Hot Tiles are available in hard wearing ceramic, thermally toughened glass, slate and a spiked carvery. Food can be displayed directly on the Tile surface. The Tiles are slim-line, backed with 18-gauge stainless steel and with their rounded locator feet. are also ideal for buffet presentation.

Our Electric Hot Tops are black glass food display warmers compact, light and easy to transport ideal for buffets. They all operate off a 13 amp socket.

Primeware's dishes are designed to complement the Hot Tiles and Electric Hot Tops to achieve a unified stylish look.

Electric Glass Hot Top

EGLHT

GWT1

Primeware's electric Hot Top is the elegant way to present hot food on counter tops & buffets. Simply plug into a 13 amp socket, leave for 10 minutes and the Hot Top is ready to use. Constructed of stainless steel and black glass and fitted with a mat type element the Hot Tops have a very even heat distribution across the surface ensuring no hot or cold spots, keeping food displayed in prime condition. Food can be displayed directly on the surface as well as in dishes. The smaller EGLHT model has a fixed thermostat whilst the GWT1 and GWT2 both have adjustable thermostats.

Sizes:

EGLHT: 345 x 545 x 65mm

GWT1: 600 x 400 x 60mm

GWT2: 800 x 400 x 60mm

(others available on request)

Electrics: 13 amp

Warranty: 1 year parts and labour for technical malfunction only.
